Sir:

Applicants submit herewith substitute sheets containing amendments to the paper copy (pages 36-44 of the above-captioned application) of the Sequence Listing. Applicants also submit herewith two copies of a replacement diskette containing a computer readable form of the amended Sequence Listing. The computer readable form of the Sequence Listing was generated and validated using the USPTO's PatentIn Version 3.2 software and is believed to be in proper form.

In accordance with 37 CFR §1.821, Applicants hereby submit that the substitute sheets and diskettes submitted herewith, include no new matter. Rather the sequence listing has merely been amended such that the numeric identifiers <213> list Human Papillomavirus as the scientific name (genus/species) of the organism. The support for these changes can be found in Table 1 of the specification.

Respectfully submitted,
